Contents

1.   Introduction

1.1.   Purpose of the document

The purpose of the specification is to define the structure and content of XML documents (called here 'messages'), sent and received by the System.

1.2.   Application

The document is used for designing, implementing and creating test and functional documentation of the System.

1.3.   The contents of the specification

Specification is delivered as "zip" file with the following directory structure:
- text: consists of specification document (this document) and document with list of changes introduced to current version of specification,
- xsd: general purpose schema files of messages (i.e. not only for AES),
- xsd\AES: schemas files of AES messages.

The following schema files do not define messages directly but are used by other schemas:
- xsd\xmldsig-core-schema.xsd
- xsd\typy.xsd
- xsd\poddokumenty.xsd

The document consists of the following components:
- Chapter „Introduction" - provides an introduction to the document;
- Sections that define XML documents - „X message", where X is the name of the message;
- Two chapters describing the requiredness rules and other rules which are used by all defined messages.

Additional Remarks.
This specification does not replace but supplements the instructions for completing customs declarations placed under the link
http://www.finanse.mf.gov.pl/clo/zgloszenia-celne-i-intrastat/zgloszenia-celne/instrukcje.

1.4.   Required knowledge

List of issues that the reader should know in order to effectively known this document:
- Knowledge of XML standards (including XSD).

1.5. Source and support documents

Designation	Description
D1	FUNCTIONAL TRANSIT SYSTEM SPECIFICATION – AES ADDENDUM REF: TSSFSF-REL4 CORR 2/2013 V1.00
D2	DESIGN DOCUMENT FOR NATIONAL EXPORT APPLICATION (DDNXA) REF: CUST-DEV3-SC03-DDNXA VER: 10.30

Table 1. Source and support documents

1.6. Abbreviations and terms

1.6.1. Abbreviations used in the document

Abbreviation	Description
AES	Automated Export System - European Teleinformation System that is supposed to include all operations related to goods leaving European Union territory.
DDNXA	Abbreviation referring to the [D2] Document.
DG TAXUD	Taxation & Customs Union Directorate General
EAD	Export Accompanying Document
EORI	Unique in the EU registration and identification number assigned to the operators by the customs authority of a Member State or by another designated authority for customs purposes.
FTSS	Abbreviation referring to the [D1] Document.
MRN	Movement Reference Number of export declaration, exit summary declaration or proof of customs status of union goods request.
NCTS	New Computerized Transit System
PDR	Reference Data Subsystem
UWU	Export Office.
W3C	World Wide Web Consortium (W3C In short) is an industry consortium which seeks to promote standards for the evolution of the Web and interoperability between WWW products by producing specifications and reference software
XML	Extensible Markup Language, a specification developed by the W3C. XML is a pared-down version of SGML, designed especially for Web documents. It allows designers to create their own customized tags, enabling the definition, transmission, validation, and interpretation of data between applications and between organizations.

Table 2. Abbreviations used in the document.

1.6.2. Terms used in the document

Term	Description
Message	XML Document that is sent or received by the System.
System	If not specified otherwise, it means AES System
XML schema	Published as a W3C specification, that defines structure of XML document.

Table 3 Terms used in the document.

1.7. Representation of Functional Message Structure

This appendix describes the detailed structure of each Functional Message Structure (FMS) for messages

- Structure
  example:

(a)	(b)	(c)
MainElement	1	-
– ElementChild	1	-
– – ElementChild1	0..1	RW11
– – ElementChild2	0..1	RW12

where:

(a) Column that defines structure of an XML document – a tree of elements. The number of „—" characters reflects the nesting level of the element in the tree.

(b) Column that defines number of repetitions of a given element . Possible values are „n" and „n..k", where n, k are integers. Value n means that the element must be repeated n times. Value „n..k" means that there must be at least n elements and maximum k elements. Typical examples are: „1" when there is only one element, „0..1" when the element may occur, but only once, „1..9" when the element must occur at least once and maximum 9 times, „0..9" when the element may occur, but maximum 9 times.

(c) This column specifies identification numbers of the rules that apply to a given element (see chapter „Rules"). If there are no rules related to a given element, the column is filled with „-" character.

- Contents
  example:

/MainElement/ElementChild/ElementChild1 (a)

A child element grouping data on this item. (b)   0..99 (c) RW19 (d)

Attribute1 (e)   - (f) z2 (g) 007 (h) W (i) - (j)
Description of attribute 1.

where:

(a) Name of an element and path with parent elements. Defined element is highlighted with bold font.

(b) Comments.

(c) Information on how many times an element may be repeated. This information is also included in „Structure" chapter.

(d) Identification numbers of the rules that apply to a given element (see chapter „Rules"). If there are no rules related to the element, the column is filled with „-" character. Rules are also defined in „Structure" chapter.

Specification of the attributes is defined in the following columns:

(e) Name of an attribute (bold font) and comments concerning this attribute.

(f) Box number of paper form (ESS or SSD) with attribute value or "-" when the attribute does not appear on paper (also when there is no paper form for the document).

(g) Attribute type (see „Data types" section).

(h) Code of a codelist that defines possible values of the attribute. If there is no codelist for the attribute, the column is filled with „-". Code lists are available under the url https://puesc.gov.pl/en/do-pobrania

(i) Requiredness of the attribute: „W" – required, „O" – optional (Optional here means only the technical optionality of the attribute from the structure point of view . The necessity of completion is defined by the rules defined in this specification and by the instructions for completing customs declarations.)

(j) Identification numbers of the rules that apply to a given element (see chapter „Rules").

- Local requiredness rules

  Contains a set of local rules that define requiredness of the elements and attributes (see chapter „Rules").

- Other local rules

  Contains a set of other local rules (see „Rules" section).

- Schema

  Refers to a schema file compliant with the XML Schema standard.

Rules applying to more than one XML document are described in the following chapters:

- Global requiredness rules

  Contains a set of global requiredness rules.

- Other global rules

  Contains a set of other global rules.

1.8.   Rules

In this specification the rule means a validation algorithm of elements and / or attributes able to be executed by software.

Each rule has the Identification number. ID starts with the characters „R", „RW", „G", „GW" that define the type of rule, followed by a number representing the number of the rule.

The rules may apply to:

•	any document defined by this specification - global rules which identifier starts with „G" and is unique within specification;
•	one document - the local rules, which ID starts with „R" and is unique within a chapter defining a document.

In respect of the type of algorithm defined by the rule, the following classification is made:

•	requiredness rules, which define whether an element or attribute is required or optional;
•	other rules.

Examples:

GW12	12th global requiredness rule

G12	12th other global rule

RW12	12th local requiredness rule

R12	12th other local rule

Some of the rules are created on the basis of [D1] document, then there is a reference to the original rules after a definition, eg. FTSS="R868*". If there is given an asterisk indicated the ID rule, it means that there has been made a change to this rule in this specification (the rule is not transferred directly).

Warning.
 The above description in terms of rules' naming convention, theirs scope (local, global) and division (global, others) does not apply to rules created since version 1.12 of specification (i.e. the rule R300). Since this version of the specification new rules are always created as a global, without distinction between global and others and start with 'R'.

1.9. Data types

• Character type is described by „zn" or „z..n", where z in an alphanumeric character and n is an integer. Defines a string of a certain length - „z..n" (allowed characters are defined in the chapter „Allowed character set"). Character type in this specification is also defined for the strings of digits which are not treated as numbers, e.g. transportation codes' type is character.

Examples of character types and valid values:
z10   1234567890
z2   PL
z..35   Firma Handlowo-Usługowa ABC S.A.

• Numeric type is described by „nk,l", where k is an integer greater that zero and defines the maximum number of digits including fractal digits and l is an integer equal or greater than zero which defines the number of fractal digits. This type defines numbers. Character „." is the separator of fractal digits; this character is not included in total number of digits.

Examples of numeric types and valid values:
n15,2   100.87; 2300; 100.8
n7,0   2300; 7777777

For a sample type n3,2 invalid value is e.g. 333.22 (valid values are 1.22, 111, 11.2)

• Date type, described by „d". Defines date. Values of this type should be entered in the following format: rrrr-mm-dd, where: rrrr is year, mm month, dd day. Character „-" (dash) is the separator. Number of month and day must be preceded by zero.

Examples of date type and valid value:
2003-03-30

• Date and time type, described by „dt". Defines date and time. Values of this type are in compliance with date type rules followed by the character „T" and time value in the following format: gg:mm:ss, where gg stands for hour, mm minute, ss second. Character „:" (colon) is the separator used in time definition. Hours, minutes and seconds must be preceded by zeros . Hours are defined in 24 – hours system.

Examples of date and time type and valid value:
2003-03-30T16:01:55

• Boolean type, described by „b". Defines two possible values „1" - yes and „0" - no.

1.10. Structure of the XML document

XML document compliant with this specification should consist of:

• XML declaration that defines version of XML standard (attribute version) and codepage (attribute encoding). The supported version of XML standard is 1.0. Example:

```
<?xml version="1.0" encoding="UTF-8"?>
```

• Body of the document, created according to the definition of elements and attributes of this specification.

An example of an XML document conforming to the specification:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<IE515 xmlns="http://www.mf.gov.pl/xsd/ECS/IE515_v1-0.xsd" EmailPodmiotu="tester@kra.mofnet.gov.pl" NrWlasny="ST-1-PT-3-IE515-KG">

</IE515>
```

1.11.   Allowed character set

Allowed character set for attributes and elements is defined by the codepage included in the declaration part of an XML document, i.e.:

<?xml version="1.0" encoding="code_page"?>

e.g.:   <?xml version="1.0" encoding="UTF-8"?>.

Allowed codepages to be used by traders are: UTF-8, UTF-16, ISO-8859-2, windows-1250. Documents sent to traders use codepage UTF-8.

Some characters are however prohibited by the XML standard regardless of the codepage. These characters, when there is a need to use them, must be replaced by the following strings:

*   Ampersand "&"   must be replaced with "&"
*   quotation mark " " "   must be replaced with """
*   apostrophe " ' "   must be replaced with "'"
*   lower than "<"   must be replaced with "<"
*   greater than ">"   must be replaced with ">"

For example string:
Firma Handlowo-Usługowa "ABC" Kowalski & Synowie S.C.
must be replaced with:
Firma Handlowo-Usługowa "ABC" Kowalski & Synowie S.C.

1.12.   Pointing to elements and attributes

To clearly point to an XML element the names of the parent elements separated by „/" (forward slash) are used. Expression begins with „/" and the required element is placed at the end.
For example to point to the element „ElementChild1" in element „ElementChild", which is located in „MainElement" element, the following expression must be used:
        /MainElement/ElementChild/ElementChild1.
To clearly point to an attribute the same expressions are used as for the elements but they are ended with „/@" characters and the name of the attribute.
For example to point to the attribute „Attribute1" of „ElementChild1" element, which is located in element „ElementChild", under element „ElementGlowny" the following expression must be used:
        /MainElement/ElementChild/ElementChild1/@Attribute1.

Additional remarks:
 - where it is clear enough pointers can start not only from root element e.g.
Towar/DocumentWymagany
 - pointers can contain alternative elements or attributes in brackets e.g. /(IE515, IE513)
means that pointer concerns IE515 or IE513 element.

1.13.   Role of schema files

Enclosed „xsd" files contain the definitions of all XML documents according to „XML Schema" (May 2001) standard of W3C.

XML parsers compliant with this standard and the „xsd" files enable the following validation types of the XML documents defined according to this specification:

- Structure validation,
- Data types validation.

Schema files do not allow checking a document against rules or checking data against codelist values.

1.14.   „Empty" attributes

Empty attributes, the value of which is only a quotation mark or which contain only white spaces, are not allowed.

Instead of:

<ElementChild1 Attribute1="3" Attribute2="" Attribute3=""/>

must be:

<ElementChild1 Attribute1="3"/>.

1.15.   Digital signature

Digital signature in XML documents is optional. However if exists, digitally signed document must meet the following requirements:

- Digital signature should be included in an additional element „<ds:Signature …"
- The „ds:Signature" should be placed as the last element of the parent element.
- The document must be signed as whole – it is forbidden to sign only selected parts of the document.
- Digital signature will be made by calling the service provided by the PKI, which is responsible for signing xml messages to the entities and verification of signatures coming from the entities.

1.16.   Exchange of messages

The exchange of messages with the AES system takes place via the PUESC system (ECIP / SEAP) or BCP (AES / AIS Gate B2A). The details of communication are contained in relevant specifications under the links:

- https://puesc.gov.pl/ecip/seap (PUESC)
- https://puesc.gov.pl/web/puesc/aes (BCP)

2. Message IE504

Export declaration amendment acceptance
If the amendment request is valid it is accepted and registered in AES and the acceptance is communicated (IE504) to the Exporter/Declarant.

4.5. Schema

The schema for the message IE507 is stored in the file IE507_v1-0.xsd which is attached to the specification.

5. Message IE507B

Arrival at exit with multiple consignments (export declarations, exit summary declarations). Message contains details of the goods presentation at exit including those of the Trader at Exit. Message is sent by the Carrier (Trader) at Exit to Customs.
MRN numbers indicated in the message may only refer to export declarations/exit summary declarations started in ECS/AES systems.
If it is not possible to present goods for an MRN or MRNs (eg. because goods have already been presented), the presentation will be rejected for those MRNs with a seperate IE508 rejection message for each MRN concerned.

6. Message IE508

Arrival at exit rejection
This message is sent by Customs to the Carrier at Exit when the IE507 message is rejected. This message is generated when the system rejects the actual IE507 message because there is either something wrong with it or missing from it. It contains the details from the IE507 in addition to the rejection reason.

12.3. Local requiredness rules

Lack of rules

12.4. Other local rules

R1	@NrWlasny must be unique accross IE515 messages in the System entered by the Trader, who is identified by the IE515/Zgloszenie/ZglaszajacyPrzedstawiciel/@TIN.

R1 @NrWlasny must be unique accross IE515 messages in the System entered by the Trader, who is identified by the IE515/Zgloszenie/ZglaszajacyPrzedstawiciel/@TIN.

Note. There is no need to insert TIN or name to message id number.

Example: 06-A-123

R2 /IE515/Zgloszenie/@LiczbaPozycji must be equal to the number of elements /IE515/Zgloszenie/Towar.

R3 /IE515/Zgloszenie/@LiczbaOpakowan must be equal to the sum of all values:
/IE515/Zgloszenie/Towar/Opakowanie/@LiczbaOpakowan,
/IE515/Zgloszenie/Towar/Opakowanie/@LiczbaSztuk,
and one for all /IE515/Zgloszenie/Towar/Opakowanie/@Rodzaj = "VQ", "VG", "VL", "VY", "VR", "VS", "VO"

DDNXA=R105*

R7 /IE515/Zgloszenie/SkladCelny/@Kraj must be "PL".

R8 /IE515/Zgloszenie/ZglaszajacyPrzedstawiciel/@Wskaznik may be equal to "00300" or "00400".

R10 In all / IE515/Zgloszenie/Towar/@ ProceduraWnioskowana must have the same value.

R13 /IE515/Zgloszenie/WynikKontroli/@Kod can only be "A3".

R16 /IE515/Zgloszenie/@P1a can not take value: "IM".

R20 /IE515/Zgloszenie/Towar/Opakowanie/@LiczbaOpakowan can take the value of "0" only if there is /IE515/Zgloszenie/Towar/Opakowanie in another goods item, having the same values @Rodzaj and @Znaki, and @LiczbaOpakowan is greater than zero.

R21 /IE515/Zgloszenie/Towar/@KodTaric must be equal to "00".

DDNXA=R868

R22 Values of the successive attributes /IE515/Zgloszenie/Towar must be consecutive, positive integers, unique throughout the declaration, ordered in the sequential fashion, starting from '1' for the first item and incrementing the numbering by '1' for each following item.

DDNXA=R007

R23 IE515/Zgloszenie/Trasa/@Kraj must be different from:
- /IE515/Zgloszenie/@KrajWysylki
- /IE515/Zgloszenie/@KrajPrzeznaczenia

DDNXA=R877

RW9	/IE515/Zgloszenie/Nadawca MUST be used AND
	        None of /IE515/Zgloszenie/Towar/Nadawca can occur
	
	    DDNXA=C510*

13.3. Local requiredness rules

Lack of rules

13.4. Other local rules

R1   @NrWlasny must be unique accross IE515B messages in the System entered by the Trader, who is identified by the /IE515B/Zgloszenie/ZglaszajacyPrzedstawiciel/@TIN.

Attention. There is no need to enter TIN or Name to the reference number.

Example: 06-A-123

R2   /IE515B/Zgloszenie/@LiczbaPozycji must be equal to the number of elements /IE515B/Zgloszenie/Towar.

R3   /IE515B/Zgloszenie/@LiczbaOpakowan must be equal to the sum of all values:
/IE515B/Zgloszenie/Towar/Opakowanie/@LiczbaOpakowan,
/IE515B/Zgloszenie/Towar/Opakowanie/@LiczbaSztuk,
and one for all /IE515B/Zgloszenie/Towar/Opakowanie/@Rodzaj = "VQ", "VG", "VL", "VY", "VR", "VS", "VO".

DDNXA=R105*

R7   /IE515B/Zgloszenie/SkladCelny/@Kraj must be "PL".

R8   /IE515B/Zgloszenie/ZglaszajacyPrzedstawiciel/@Wskaznik can be equal to "00300" or "00400".

R10	In all /IE515B/Zgloszenie/Towar, the attribute @ProceduraWnioskowana must contain the same Value.

R16	/IE515B/Zgloszenie/@P1a can not take value: "IM".

R20	/IE515B/Zgloszenie/Towar/Opakowanie/@LiczbaOpakowan can take value "0" only if /IE515B/Zgloszenie/Towar/Opakowanie exists in a different item number, contains the same value @Rodzaj and @Znaki, and @LiczbaOpakowan is bigger than zero.

R21	/IE515B/Zgloszenie/Towar/@KodTaric must be equal to "00".
	DDNXA=R868

R22	In one by one /IE515B/Zgloszenie/Towar values @Nr contains unique numbers, in sequential order, starting from 1 for the first item, and ascending in incremental fashion by '1' for each following item.
	DDNXA=R007

R23	/IE515B/Zgloszenie/Trasa/@Kraj must be different than: -/IE515B/Zgloszenie/@KrajWysylki -/IE515B/Zgloszenie/@KrajPrzeznaczenia.
	DDNXA=R877

R27	IF /IE513B/SprostowanieZgloszenia/@UCWywozu is NOT equal to /IE513B/SprostowanieZgloszenia/@UCUzupelnienia THEN /IE513B/SprostowanieZgloszenia/@UCUzupelnienia must occur.

RW9	/IE515B/Zgloszenie/Nadawca MUST be used AND None of /IE515B/Zgloszenie/Towar/Nadawca can occur
	DDNXA=C510*

RW34	IF /IE515B/Zgloszenie/@OplatyTransportoweMP is given THEN
	        /IE515B/Zgloszenie/Towar/@OplatyTransportoweMP can not be used
	ELSE
	        /IE515B/Zgloszenie/Towar/@OplatyTransportoweMP is optional.

	DDNXA=C576

RW38	IF /IE515B/Zgloszenie/Nadawca/@TIN = /IE515B/Zgloszenie/ZglaszajacyPrzedstawiciel/@TIN THEN
	        /IE515B/Zgloszenie/ZglaszajacyPrzedstawiciel/@Wskaznik is required
	ELSE
	        /IE515B/Zgloszenie/ZglaszajacyPrzedstawiciel/@Wskaznik can not occur.

13.5. Schema

The schema for the message IE515B is stored in the file IE515B_v1-0.xsd which is attached to the specification.

14. Message IE515C

Simplified customs declaration (authorization required).
Notification contains data of simplified customs request for export procedure. It is sent to the system by Declarant/Representative.

16.5. Schema

The schema for the message IE516 is stored in the file IE516_v1-0.xsd which is attached to the specification.

17. Message IE521

Diversion rejection notification. This message is sent by Customs to the Carrier at Exit when the requested "diversion" of the movement is rejected. This message is generated in response to IE507 when no data for requested MRN is available in the office of export. On presentation of goods exit office checks for movement data in the system. If the data is not available in their system, IE502 request is sent to export office, which in turn responds with IE503 message. If the IE503 does not contain movement data, exit office generates IE521 and sends it to the Trader at exit to inform about rejection of diversion request. The message contains the MRN as submitted in the IE507 in addition to the reason as to why the diversion of the movement was rejected.

22.3. Local requiredness rules

Lack of rules

22.4. Other local rules

R1	@NrWlasny must be unique accross IE547 messages in the System entered by the Trader, who is identified by the / IE547/Manifest/Przewoznik / @ TIN. Note. There is no need to insert TIN or name to message id number. Example: 06-A-123
R2	/IE547/Manifest/Towar/@KodTowarowy must contain 6 digits (HS code), or 8 digits (code CN).
R3	/IE547/Manifest/@LiczbaPozycji must be equal to the number of elements /IE547/Manifest/Towar.

R4	/IE547/Manifest/@LiczbaOpakowan must be equal to the sum of all values: /IE547/Manifest/Towar/Opakowanie/@LiczbaOpakowan, /IE547/Manifest/Towar/Opakowanie/@IloscSztuk, and 1 for all /IE547/Manifest/Towar/Opakowanie/@Rodzaj equals VQ", "VG", "VL", "VY", "VR", "VS", "VO".
R5	/IE547/Manifest/@MasaBrutto must be equal to the sum of all /IE547/Manifest/Towar/@MasaBrutto.
R6	If In elements /IE547/Manifest/Towar values @Nr must be consecutive positive integers starting from 1.
R7	/IE547/Manifest/Towar/Opakowanie/@LiczbaOpakowan can take the value of "0" only if there is /IE547/Manifest/Towar/Opakowanie in another item, having the same values @Rodzaj and @Znaki, and @LiczbaOpakowan is greater than zero.
RW2	IF in /IE547/Manifest/Towar/DaneCelne/WywozCzesciowy @ = "0" Then /IE547/Manifest/Towar/DaneCelne/@TowarNr, /IE547/Manifest/Towar/DaneCelne/@LiczbaOpakowan, /IE547/Manifest/Towar/DaneCelne/@LiczbaSztuk, /IE547/Manifest/Towar/DaneCelne/@ MasaBrutto can not occur Otherwise, /IE547/Manifest/Towar/DaneCelne/@TowarNr is required (and the other attributes is given according to quantities exported with notification) DDNXA = C555*
RW4	/IE547/Manifest/Towar/DaneCelne/@Nr is another number from the list of numbers in this communication. DDNXA=R887

31. Message IE599

Export notification
Notification contains data of declaration from the moment of declaration release for exit procedure (see notification IE529) as well as confirmation of export (the date of exit is provided) or stoppage of the goods at the border (the date of exit stop is provided). It also may contain information from the exit office and information of possible change of this office. Is sent back to the lodging entity.
Information from exit office is marked in attribute titles or elements by suffix "Gr" (border) and comments by suffix or name "GrK" (border comment). Additionally for marking the status of goods items, packages, containers, required documents at exit office in case of discrepancies with export office the attribute "StanGr" is used.

The schema for the message IE599 is stored in the file IE599_v1-0.xsd which is attached to the specification.

32. Message IE5PCA

Notification of the decision taken regarding the request for certifying Community status of goods (IE5PCS).
It is sent by customs office (@UCWniosku) to the requesting trader
(Wnioskuj cyPrzedstawiciel) declared in the initial request.
The request is accepted when @MRN exists and WynikKontroli/@Kod = 'A1' (Satisfactory) lub 'A2' (Considered satisfactory). If there is no @MRN or WynikKontroli/@Kod = 'B1' (Not satisfactory) the request is rejected.

36.5. Schema

The schema for the message IE5PCS is stored in the file IE5PCS.xsd which is attached to the specification.

37. Message IE5PT

Information on presenting the goods at export customs office, for procedure standard, incomplete, simplified.
IE5PT is used for customs declarations where previously indicated that declaration is submitted before goods presentation (suggestion, ie: for standard procedure indicated by "D" in attribute 1b of XML document), correct messageregistered in system AES will initiate declaration acceptance - ie: assignment of MRN id (that depends off system parameters).
