

Visibility of authorisations on PUESC when associating a representative with a company

The tables below contain a catalogue of granted authorisations for PUESC services, along with the conditions upon which the visibility of these authorisations on the registration or update of representation application form depends.

You select authorisations when submitting an application for registration or update of representation – using the form **WPE0001 Registration update of company representation [SZPROT]** available under the [Associate a representative with a company service](#).

Please remember that all extended authorisations and authorisations for systems that you select in the WPE0001 application form on PUESC must be entered directly into your power of attorney. Check the exceptions in the description of the [Associate a representative with a company service](#).

11	OSOZ2 - emergency communication	excise duty, customs (EORI)	yes	no

If you **cannot see extended or system authorisations in the application**, it means that the company you wish to associate with has not registered in the area of operation related to that authorisation. To update the registration, use the [Change your company details on the PUESC portal](#) service.

If you **cannot see any authorisations**, it means that the representative has not verified their identity. To verify their identity, the representative must take the actions described on the [Ways of confirming a person's identity](#) page.

If you cannot see authorisations for customs systems (AES, AIS-ICS, AIS-Import), it means that the representative has not accepted the following declaration: "I declare that I have familiarised myself with the User Manual for electronic customs declarations in import procedures and/or the Instruction for exporters/declarants regarding the handling of export declarations in the AES system, and I undertake to apply them in commodity trade practice." The representative can check their declaration status in the [Create an account or check you details](#) service. To accept the declaration, the representative must use the [Change your data](#) service.

You can verify if a company is registered by using the entity search tool provided in the [Check if the company is registered](#) service.

If the data of a company already registered on PUESC is out of date, use the [Change your company details on the PUESC portal](#).
